\* People may be served in different household configurations over the course of a year, so the sum of the rows reported by household composition may exceed the total number of persons reported.

\*\* Data required to identify some sub-population groups are only collected from a subset of projects within HMIS; therefore, these data will not identify everyone with these characteristics who accessed homeless services.

\*\*\* Since data collection for this field was not required until October 1, 2023, and enrollments recorded prior to that date may not be updated, this data may be incomplete.

<p>* Gender, race and ethnicity estimates from 2024 are reported with a different methodology than in previous years and therefore should not be compared to estimates from previous years. CoCs that conducted sheltered-only counts in 2024 will see "N/A" for population categories with new methodologies.</p> <p>** Ethnicity and race categories are defined differently for M7.1b than they are for all other measures due to differences in source data. Each category not labeled with "and Hispanic/Latina/e/o" or "Only" includes all people who identify as that race and Hispanic/Latina/e/o plus all people who identify as that race only.</p>
